#### NOTIFICATIONS.

*Fort St. George, February 8, 1918.*

No. 32.—Under the Indian Universities Act, 1912, section 10, the Chancellor of the University of Madras is pleased to nominate the following gentleman to be Ordinary Fellow of the Madras University:—

The Hon'ble Lieut.-Col. Gerald Gifford Gifford, C.B., I.M.S.

*Colombo, August 7, 1912.*

No. 33.—For the existing rule 51 (1) of the Grant-in-Aid Code substitute the following:—  
(a) Grants will not generally be given for a school building that fails to meet the requirements specified in Appendix L (A).

(b) Rooms in hotel buildings for the construction of which a grant is sought must be of not less than the following dimensions:—

(i) Dormitories must be large enough to allow, if for a single pupil, 80 superficial feet and 9'6 cubic feet; if for more than one pupil, a proportionately diminishing space down to 30 superficial feet and 300 cubic feet per head for two or more pupils. A space of at least 6 superficial feet and 60 cubic feet per head should be provided in every room used as a dining-room or for any other dwelling purposes other than sleeping.

2. Insert the following as Appendix L (A) in the Code:—

#### APPENDIX L (A).

General Rules.

*Instructions as to the sanitary and hygienic requirements to be observed in the designing and construction of school buildings in the Presidency of Madras.*

*Selection of sites.*

In the selection of a site the following points should be weighed against considerations of economy, convenience, proximity to houses of parents, etc.:—

(i) A site should not be selected if the natural position is in a hollow or in the neighbourhood of high trees or houses which prevent the free circulation of air and the access of sunlight to the school buildings. Shady trees are, however, of value in the playground provided that they do not unduly reduce the space available for play and are not planted so close to the school buildings as to obstruct the entry of light into the class rooms, or in course of time, to cause damage to the structures.

(ii) Moist soil should be avoided and, so far as possible, all soils which are specially extensive of moisture.

(iii) Sufficiency of space is important, and in the connection the possibility of future extension and the necessity of giving subsequent class rooms the proper circulation should be borne in mind.

(iv) Classrooms and tanks in the vicinity are a disadvantage.

(v) The presence of rank vegetation, more especially privet, is objectionable.

(vi) The neighbourhood of dusty and noisy roads and of shops or factories should, as far as possible, be avoided.

3. All sites plans should show the nature of the surroundings, the height of the neighbouring buildings, the north point and the direction of the prevailing wind.

#### *Orientation of buildings.*

3. This will differ for different parts of the Presidency and will depend chiefly on the best way to secure perfection of site. Subject to this the rear buildings are lighted from the south the better.

#### *Floor space.*

4. When funds are available, they should be utilized in providing floor space in rooms of the following minimum requirements:—

For elementary schools	6½ square feet per pupil
For secondary schools	11
For training colleges and technical schools	18

Rooms which are intended to be used for practical work, such as laboratories, drawing rooms, workshops, etc., should be carefully designed with a view to the nature of the work and the number of students to be accommodated.

#### *Construction of floors.*

5. It is desirable that the floors should be made of a material which will stand up to being washed with water. Stone flagging or something better must be placed in rooms where desks or benches can be provided. Where the pupils have to sit on the floor, stone floors, need not be insisted on if objected to. At the same time it must be recognized that from the hygienic point of view they are to be preferred and the objection on the score of their coldness can be met by providing boards or cover. But where this is done, the greatest care must be taken to ensure that the mats are kept scrupulously clean.

#### *Seating arrangements.*

6. The general principles which should govern the construction of desks are set forth in Annexure (i). Where dual desks are used, the desks may be arranged either suitably as shown in diagram, Annexure (ii).

7. Desks without backs and desks are objectionable; type designs for desks are issued by the department.

8. Pupils should be seated in rows with the sunlight falling from the left side; they should never face the light. The same remark applies to the teachers.

#### *Windows.*

9. Windows serve two purposes:—

- (a) Admission of light.
- (b) Admission of air.

10. They should be placed at regular distances so as to ensure uniformity of light.

11. Window sills should not be more than 4 feet from the ground in rooms in which the scholars are seated at desks. When pupils sit on the floor the sills should come to within 2½ or 3 of the floor level. Windows for subsidiary lighting may have their sill more than 4 feet from the floor.

12. The window area should not be less than one-fifth of the floor area and wherever possible the principal lighting should be from the north.

#### *Doors.*

13. Class rooms should not have to be used as passages from one part of the building to another. They should consequently not open into one another but into passages or verandahs. No class room should have more than two doors and in most cases one is preferable. The door or doors should be at the teacher's end of the room.

#### *Height of class rooms.*

14. The minimum height of the space in secondary schools, training colleges and technical schools should be 12 to 14 to 16 feet when the room has no open skylight and 14 to 16 to the outer side of the eaves where thereon has a terraced ceiling. In elementary schools the minimum height should be 10 and 12 respectively.

#### *Ventilation.*

15. Unless there are windows reaching to the top of the wall and capable of being opened, ventilators are necessary near the top of the wall. These ventilators should be regularly distributed in the same way as the windows. For each pupil 35 square inches of open ventilation should be provided.

*Dimensions and fittings of class rooms.*

16. It is important that no school or class room should be more than 24' in width, or otherwise the care of pupils will be too long to be properly controlled by the teacher. The length of a room must depend on the number of classes to be held in it. In the case of a school divided into a number of class rooms, the dimensions of any space should not exceed 24' x 35', that is, an approximate square. If it is admitted that a square is the best area for teaching purposes, the length of a class room in a one-roomed school should approximately relate to some multiple of the width. Any wall backboard space should be provided especially on the wall at the teacher's end of the room which should be unbroken by doors, windows or cupboards. Cupboard recesses in other walls should be unbroken by doors, windows or cupboards. Recesses under the window for hanging maps, pictures and diagrams are essential. The smallest class room for 40 boys or 30 girls should be 24' wide and 35' long. The arrangement of such a room is shown in the enclosed diagram. No. C.A. 265 of 1907, Annexure (1). The room should suitably admit of larger dimensions than those of the room must be proportionately increased.

*Boys.*

17. The wall should, as far as possible, be impervious to heat.

*Sanitary arrangements.*

18. Lavatories should not be placed nearer than 40 feet to any school building. They should be so situated that the prevailing wind will not blow from them in the direction of the school.

19. The type design of the sanitary department should be consulted when providing lavatories.

20. For boys' schools separate urinals and latrines should be provided. Separate accommodation should be provided for the teaching staff.

21. The number of latrine seats should be on the following scale:—

	Under 30 children	30 to 50	50 to 75	75 to 100	100 to 150	150 to 200	200 to 300	300 to 500
Boys	1	2	3	4	5	6	12	20
Girls	1	2	3	4	5	6	12	20

22. There should be in addition for boys urinals at the rate of 4 percent on all separate urinals not provided; the number of latrine seats should be correspondingly increased.

Note—It is not intended that all these figures should be applied in the case of elementary schools. In preparing plans for a new school building only such points as refer to sanitary matters only are applicable to all cases of new school buildings.

*Accessories (a).*

The seat should not be so high as to prevent the child resting his feet upon the floor, or as a backboard, and if the latter, the knees should not be cramped.

2. Assuming a child to be sitting upright in his seat and the arms to be hanging freely down the edge of the desk rest for the body should be about an inch higher than the level of the elbows in the case of boys, and from 1½ to 2 inches in the case of girls.

(If the desk be higher than this, there is a tendency for the boy to be twisted and for one shoulder to be raised above the other with the consequent risk of lateral curvature of the spine.)

3. A line dropped from the edge of the desk ought to strike the edge of the seat at a point as high as the knees.

(This arrangement obliges the child to assume an upright position which is best for the eyes and the spine.)

4. No seat should be without a back, and the top of this should be one inch lower than the edge of the desk in the case of boys, and one inch higher than the edge of the desk in the case of girls. (In schools which are graded, great importance will be found in the size of the elbows to seat men, to meet which it is desirable to provide three sizes of desks. In schools of mixed ages there should be a large number of sizes.)

5. The desk must not be flat. It should slightly incline towards the child.

6. The seat should not be flat, but saddle-shaped. Change of position will be desirable.

7. The desks must be easy of access yet compactly arranged. The angle of vision for the teacher should be not more than 45°.

*Height and dimensions.*

(1) The sloping part of the top should be not less than 12 inches in width.

(2) The inclination should be about 2 inches and the slope should be about 1 in 10.

(3) The flat portion of the desk with the grooves should be from 8 to 12 inches in width.

(4) The proper height allows the forearm of the seated child to rest horizontally upon the desk without discomfort.

(a) Youngest children 33" to 35" to the middle of the slope.

(b) Intermediate children 35" to 37"

(c) Older children 37" to 39"

The seat should be 16½ inches high.

- (5) The back wall should be not more than 7 inches for younger children and not more than 10 inches for the older ones.  
 (6) The minimum space for each child should be 20 inches, 32 inches would be better.  
 (7) The width of the gangway should be 18 inches at least.  
 (8) The seats should be 8 inches wide.

**Conditions of Auction Sale.**

I. A deposit must be made by each bidder before bidding and will be received by the selling officer on the day of sale. A deposit of Rs. 25 will not be required from any person willing to bid for any important shop or any large number of shops. This will be reduced to Rs. 25 in the case of bidders for not more than two or three shops of an aggregate monthly value of Rs. 25 or less and to Rs. 5 in the case of bidders for single small shops.

II. The shops will be put up to auction in the order in which they are notified, unless the selling officer sees reason to change that order. Highest prices will be fixed at the discretion of the Collector. The reserve price fixed by Government on the shops will not be published, but the amount of the previous five paise estate will be notified by the Collector, whenever possible, for the information of bidders.

III. No person will be allowed to bid for another unless he holds a power of attorney from him.

IV. The officer conducting the sale may, at his discretion, refuse to accept the bid of any person on the ground (1) that he has been convicted by a Criminal Court or has previously been guilty of such a breach of the conditions of license as of a convict under the Opium Act as to render him

U-507-1

responsible as a holder of a license; or (5) that he is involved or is arrears in Government; (5) that he has been previously convicted; (6) that he is a village officer or a holder of a village office at the village in which the shop is situated or which is adjacent to the shop or at a village bearing village; (7) that he is an owner or holder of property adjacent to the licensed shop, either within the shop is situated; (8) that he is a member of the village; (9) that such a license is necessary to prevent encroachment in the district of Government interests; or (10) for any other valid reason.

7. The shop will be licensed under the highest bid or, if no bid is received, the highest bid will be taken as the highest bid. If for any of the reasons mentioned in the preceding clause the highest bid is rejected, the next highest bid shall be taken as the highest bid at the selling officer's discretion. In case of dispute the selling officer's decision shall be final. The sale will be subject to formal confirmation of the Collector, who shall be at liberty to accept or reject any bid at his discretion. Such formal confirmation will be tantamount to an acceptance of the bid, unless rejected by the Board or Revenue by order of revocation, and will be necessary whether the sale be held by the Collector himself or by any officer appointed by him.

VI. At the close of each day's sale, the deposits made by the successful bidder will be returned to them. At the auction payments, each person whose bid is accepted shall pay, or, if so required by the selling officer, at the close of the day's sale, make a further deposit of half a month's rent (in addition to the deposit made under clause IV) for each shop within the initial deposit equal to one-eighth of one month's rent. Should he fail to do so, the deposit made by him under clause IV will be forfeited and the shop will be put up again immediately by the selling officer on the above conditions or otherwise disposed of by the Collector and the balance will be returned from bidding agent for the same or for any other shop.

VII. Any person to whom a shop has been licensed under and who has made deposits as provided in clauses V and VI shall also deposit, in cash or approved security, within ten days from the date of commencement of the Collector's possession of the bid, such further sum as with the former deposits will make up one month's rent and shall without unnecessary delay take out a license on the conditions hereinafter set forth. In the event of the purchaser's death within one year of the license, his heirs and assigns shall be responsible for all amounts that may become due to Government under the terms of the license as well as for the proper maintenance of all the buildings of the license. Should the initial deposit exceed two months' rental, the excess will be refunded unless the purchaser is requested to deposit more than was under clause VII paid.

VIII. If an applicant is unable to make the purchase shall be found to be of doubtful solvency, he may be required either to deposit two months' rental in addition to the sum provided in clause VII above, or to put a security or surety to secure a security bond for the due payment of all amounts that may become due by him under the terms of the contract. The bond shall be stamped (Section 27, Schedule I, Act II of 1891) and registered at the expense of the purchaser if the amount secured exceeds Rs. 1,000. In all cases where sureties are demanded the Collector shall be bound to secure a counter-security agreement.

IX. On the failure of any person to make a deposit or take out a license under clause VII or to comply with any requirement or to comply with any requirement under clause VIII above, the deposit already made may be forfeited and the shop may be sold under the order of the District Officer or a date to be notified by the Collector or may be otherwise disposed of by the latter officer. Besides under this clause will be at the risk of the defaulting bidder, who will forfeit all sums, and in the event of a loss, will be required to make good the deficiency between the total amount payable for the whole period under the terms of the original sale and the total amount payable by the successful bidder at the result. In the latter case, the forfeited deposits will be deducted from the loss arising from the sale, and the remainder, if any, will be recoverable in the same manner as if it were an amount of bond money. Should, however, the forfeited deposits be greater than the loss by result, the whole of such deposits will be credited to Government. The defaulting bidder will be suitably liable if the shop is disposed of otherwise than by result and such deposit results in loss to Government as compared with the original sale.

X. The purchaser of any allotment or open writings is liable to the penalties prescribed for holders of the allotments and forth below, though a formal license may not have been issued to him.

XI. The deposits referred to in clause VII or VIII may be made either in cash or in approved Government, Port Trust, Municipal or Local Board securities or by depositing Postal Savings Bank pass-books. When deposits are made otherwise than in cash, the Collector may demand that they shall be of such higher face value than the cash deposit required, as in the circumstances of the market he may think necessary. The securities or savings bank pass-books deposited must be submitted in the name of the Collector and Government promissory notes may be issued for payment of interest at the discretion at which they are deposited, if so required. Deposits in cash will be adjusted towards the instalments of bids due in the last month of the period of the license. Deposits or securities or savings bank pass-books will be returned upon payment of the full amount of the terms of the sale unless the applicant wish that Government should take them over, in which case they will be taken over at the price of the day, and the balance, if any, due to Government must be paid in cash. In cases of default under clause IX of the conditions of contract under clause 27 of the General Regulations applicable to all Alkali and Dynamite licenses, all securities deposited are liable to be sold for any amount due to Government under the terms of the license, the remainder, if any, due after such sale, being returned as excess.
